Suggestions for improving standardized testing include evaluating a student's overall growth, possibly including non-cognitive qualities such as social and emotional behaviors, not just achievement; introducing 21st century skills and values; and making the tests open-ended, authentic, and engaging. First, as in most other fields in which it now plays an increasingly important role, there is, as yet, little agreement within risk management on the nature of trust or on how it should be studied.

For a person of exercised intellect, there is no way of attaining anything equal to the
